

# 1323 Athlete Cardiac Arrests, Serious Issues, 900 Dead, After COVID Injection

It is definitely not normal for so many mainly young athletes to suffer from cardiac arrests or to die while playing their sport, but this year it is happening. Many of these heart issues and deaths come shortly after they got a COVID vaccine. While it is possible this can happen to people who did not get a COVID vaccine, the sheer numbers clearly point to the only obvious cause.

It wasn't intentional, but at one point there were ominous numbers in the headline. 2 to the 10th power and 666 dead athletes.

The so-called health professionals running the COVID vaccine programs around the world keep repeating that *"the COVID vaccine is a normal vaccine and it is safe and effective."*

In response to their pronouncement, here is a non-exhaustive and continuously growing list of mainly young athletes who had major medical issues in 2021/2022 after receiving one or more COVID vaccines. Initially, many of these were not reported. We know that many people were told not to tell anyone about their adverse reactions and the media was not reporting them. They started happening and ramping up after the first COVID vaccinations. The mainstream media still are not reporting most, but sports news cannot ignore the fact that soccer players and other stars collapse in the middle of a game due to a sudden cardiac arrest. Many of those die – more than 50%.

Gary Dempsey, professional soccer player played 500 games over 20 years, with no cardiac arrests.

We also note that many posts in Facebook, Instagram, twitter, forums and news stories are being removed. So now we are receiving some messages saying there is no proof of the event or of vaccination status. That is partly because this information is being hidden.

More people are writing to tell us that in many cases, we didn't mention a person's vaccination status. There is a good reason for that. None of the clubs want to reveal this information. None of their sponsors want to reveal it. The players have been told not to reveal it. Most of their relatives will not mention it. None of the media are asking this question. So what should we do? Stop this now? No, we will collect as much information as we can, while it is still available, because eventually, more information will come out, and we will be here to put it together. Will it mean anything? We don't know. What we do know is that there is a concerted world-wide effort to make this information go away, so that fact alone tells us it must be collected, investigated and saved so other researchers can look at it to see if there are any useful patterns.

We replaced about a dozen occurrences of the word "shot" with "injection" because translation into other languages is improved, on advice from a reader.

We really appreciate the athletes named in this list (or their families) who have confirmed what happened to them so the truth can be known. They care about their fellow athletes, even if the clubs, their sponsors, media, politicians and so-called health professionals do not.

## Prior Year Data

The International Olympic Committee in Lausanne, Switzerland, studied documents from international data banks from 1966 to 2004. Those documents indicate 1,101 sudden deaths in athletes under 35 years of age, an average of 29 athletes per year, the sports with the highest incidence being soccer and basketball. ([NIH Document](#))

A [study by Maron](#) on sudden death in US athletes, from 1980 to 2006 in thirty-eight sports identified 1,866 deaths of athletes with cardiac disease, with a prevalence of hypertrophic cardiomyopathy.

2005 to 2006 averaged sixty-six (66) deaths per year, with 82% of those occurring during competition or training.

Thanks to investigator readers for discovering these reports, and this story in Spanish: [Momento Deportivo](#).

In 2021 and 2022 so far, cardiac disease has not been mentioned. Hypertrophic cardiomyopathy was mentioned twice, but those two reports were listed in the “not vax related” list. “Enlarged heart” was only mentioned three times, but there was no indication this was a long-term or recent issue (possibly due to vaccine injury).

The above shows that in prior years, there were 66 deaths per year, but there have been 89 reported in January 2022, so far.

Athlete collapses and deaths chart from 1st January 2021 to 31st August 2022. Good Sciening.

## Growing Report

This story will grow over time, as new information is added. If you have proof of information that we don't already have, or if you have a correction, please send it through our contact form, with as much information as possible. Useful information would be the person's name, age, what happened to them, if they had the COVID vaccine(s), date of event or death, link to any news story.

Special thanks to readers who have provided corrections, found errors that we missed, or provided new information we didn't know about. It is now a real team effort and we appreciate it.

\*\* Currently working through 26 new reports. 17th September 2022.

For the skeptics who believe this is normal, feel free to repeat the following 18 words, after reading each name in this list.

## Repeat This After Reading Each Line

***“The COVID vaccine is a normal vaccine. The COVID vaccine is safe. These injuries and deaths are normal.”***

## September 2022 – (Note reverse month sort) (Day/Month/Year)

1. 04/09/2022 Arkansas, USA **Dead**
